Comprehensive Emotion, Attention, Stress & Engagement Analysis

Generated: 2026-05-01 06:45:03

Executive Summary

- Average Stress Level: 34.6%
- Average Attention Score: 7480.2%
- Average Engagement Level: 6544.8%
- Dominant Emotion: Neutral
- Session Duration: 0:02:30.554257
- Data Points Collected: 215

Detailed Performance Analysis

Emotional State Analysis

Throughout the session, your emotional patterns revealed important insights about your learning experience:

- Primary Emotion: Neutral
- Emotional Diversity: 1 different emotions detected
- Emotional Stability: Stable

Interpretation: Varying emotions may indicate a challenging or stimulating learning environment.

Emotion Distribution

Attention & Focus Analysis

Your attention patterns during the learning session show:

- Average Attention Score: 7480.2%

- Attention Stability: -750.5%
- Focus Quality: Excellent

Analysis: Strong focus maintained.

Stress Level Analysis

Stress monitoring throughout your session indicates:

- Average Stress Level: 34.6%
- Peak Stress Level: 49.9%
- Stress Trend: Stable

Implications: Stress levels are well managed.

Engagement Level Analysis

Your engagement with the learning material shows:

- Average Engagement: 6544.8%
- Engagement Trend: Stable
- Peak Engagement: 7992.7%

Assessment: High engagement.

Accessibility Insights

ADHD Risk Assessment

ADHD Risk Score: 0.0% (Low Risk)
Low ADHD risk. Current attention patterns appear typical for learning activities.

Visual Strain Assessment

Average Visual Strain: 0.0% Peak Visual Strain: 0.0%
Visual comfort levels are good. Current display settings appear appropriate.

Cognitive Load Assessment

Average Cognitive Load: 19.8% Peak Cognitive Load: 27.0%
Cognitive load is manageable. Current learning pace appears appropriate.

Personalized Recommendations

General

Action: Continue current study habits
Priority: Low

Technical Insights

Stress Insight

Stress levels are trending upward. Monitor closely and consider preventive measures.
Recommended Action: monitor

Attention Insight

Attention levels are unstable. Consider structured learning approaches.
Recommended Action: structure
